(54) Title: DISPLAY DEVICE AND BLANK THEREFOR

(57) **Abstract:** A display device (10) comprises an elongate strip (12) of sheet material having a plurality of product carrying pockets (14) each pocket (14) being provided with a pair of laterally spaced front sections (16, 18) in a plane substantially parallel to the plane of an adjacent rear section (20) of the elongate strip (12), each front section (16, 18) being attached to said rear section (20) at its upper edge (22, 24) respectively, by means of upper bridge portions (26, 28), further attachment between a further section (30) of the rear section (20) and the front sections (16, 18) is provided by a lower bridge portion (32) intermediate the front sections (16, 18) and which is attached adjacent the lower edges (34, 36) thereof.
